

Elastic Tubular Bandages

McKesson elastic bandages provide comfortable, controlled and consistent compression for strains and sprains, soft tissue injuries, support following cast removal, general edema, post-graft pressure for burn patients and rib injuries. They can be can be sterilized by autoclaving. Recommended autoclave cycle: 275° F for 4 minutes.

Features and Benefits

- Consistent support provided with a single layer
- Adjusts to the contours of the body and helps distribute pressure evenly over the surface
- Stays in place without clips, pins or tape
- Full range of sizes to suit most applications
- Washable and reusable
- Not made with natural rubber latex
