

McKesson offers a full range of electrodes for resting ECGs, monitoring or general diagnostics. With products varying in sizes, shapes and substrates, McKesson ECG electrodes are designed to address your clinical needs. Our electrodes feature a silver/silver chloride (Ag/AgCl) sensing system, which is defibrillation recoverable. We also offer a McKesson resting tab electrode with tin backing designed for optimal conduction and fast readings. Our electrodes are designed to deliver excellent adhesion, as well as consistent, reliable tracings and performance, which meet ANSI/AAMI EC12:2000 standards.
